Sportsturf Projects 1991 to date

Established in 1991, Links Turf Layers (UK) offered clients a specialist preparation, turf laying and aftercare service tailored to the needs of the golf course construction industry.

In 1994 we bought our first Rotadairon stone-burying machine which had recently been introduced into this country. These machines have revolutionised a contractor's approach towards grass seeding / turf laying works and the quality results that can be achieved on a wide variety of soil types.

We now offer construction, renovation and aftercare management services for golf courses, sports pitches, schools playing fields, Local Council facilities, sports clubs and associations. Clients have contracted our services across the UK, and listed below is a summary of some of our major works.

1991

Trent Lock Golf Club, Nottinghamshire – 9 Holes. New Build.

Mendip Springs Golf Club, Congresbury – 18 Holes. New Build.

Thrapston Bowls Club, Northamptonshire.

Raunds Bowls Club, Northamptonshire.
